Faculty of Medicine University of Banja Luka

Since its founding, the Faculty of Medicine has grown rapidly, expanding its programs beyond Medicine, Dentistry, Pharmacy, and Nursing. New programs now include Midwifery, Physiotherapy, Radiological Technology, Sanitary Engineering, and Medical Laboratory Diagnostics. The faculty also houses the Center for Biomedical Research.

The Center for Biomedical Research trains future researchers to independently and creatively apply scientific knowledge and engage in research projects. Equipped with advanced labs in fields like molecular biology, genetics, immunology, and pharmacology, it also supports experimental animal research. Around 20 young researchers work there, driving the Center's scientific progress.

Every year on November 15th, the Faculty of Medicine celebrates the anniversary of its first lecture held. On this occasion, a graduation ceremony is held, and teaching staff are awarded for their contributions.
