Think Tank UEW – Reports and Analyses

The UEW Think Tank publishes reports and analyses on key socio-economic issues, supporting data-driven decision-making

One notable initiative is the project *“Dissemination of the content of the UEW Scientific Papers Journal”*, aimed at promoting academic knowledge to a wider audience

This includes the think tank’s journal: **TT: Impakt Dolny Śląsk**.

The published reports address issues such as energy transition, digitalization, demographics, and startup development, offering concrete recommendations for policymakers and local communities

Local Leaders School (SLL) – "High Quality of Life Leader"

- SLL is a leadership development program carried out in cooperation with Wrocław University of Science and Technology and Wrocław University of Environmental and Life Sciences.
 - Students work on real-life challenges submitted by municipalities from the Lower Silesia region, under the guidance of academic tutors. They develop skills in areas such as sustainable development, management economics, and spatial planning.
- The program runs from November to June and concludes with a certificate and additional ECTS credits for participating students
- Student ideas presented in the final reports are often implemented by municipalities in practice

Business Individual Study Program (BIPS)

Dream Job

Dream Life

Dream Place

- **BIPS is an innovative mentoring program in which students collaborate in triads: student – academic tutor – business mentor.**

BIPS is an original initiative of Wrocław University of Economics and Business, focused on building strong connections between **students, academia, and business.**

- Its main goals include:
 - accelerating students' professional, personal, and social development,
 - individualizing the educational path,
- offering support from both an academic tutor and a business mentor.
- Each year, dozens of students participate in the program.

□ University Social Responsibility

UEW actively promotes social responsibility through initiatives such as *"Leaders of Knowledge – Leaders of Success"*, in which academic staff deliver lectures and workshops for high school students.

In the 2022/2023 academic year, the program engaged **4,290 students** from **25 high schools**.
